Details

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum

DEMO

Project Challenges

- Learning AngularJS
- Dealing with Firebase API
- The pain of AWS S3
- Backend security rules in (TypeScript)
- Material Design, (Angular Material for styling and mockup)
- Other classes
- Finding a name for this project.

Status Update

Punch list:

1. Finish submission page (this week)
2. Finalize handling retrieved documents from AWS DB (this week)
3. Enhance security rules. (the following week)
4. Make the app pretty.

By raise of hand, which name should I go with?

- (1) School Tutor?
- (2) InstaTutor?
- (3) Both really suck!

Any questions? Comments?
